### PRODUCT OVERVIEW

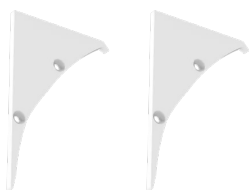

The ARC-DWEM 2 Metre Drywall LED Plaster-In Profile with Wide Angle Diffuser is a recessed aluminium channel designed to integrate seamlessly into drywall or plasterboard surfaces for modern, trimless LED lighting.

It features a ~13 mm internal channel suitable for most standard LED strip lights and comes with a wide-angle opal diffuser included, which helps soften and spread the light across a broader area for even, ambient illumination. Finished in white, this profile blends discreetly into walls or ceilings and is ideal for creating uniform general lighting or accent lighting in residential and commercial interiors
