PRODUCT OVERVIEW

The ARC-S-PBEWW 2 Metre Slim Embedded Plaster-In LED Profile (White) is a recessed aluminium LED channel designed for a clean, flush finish in plasterboard walls or ceilings. Its slim embedded design allows the profile to sit seamlessly within the surface, providing a minimalist and modern lighting look.

With a white finish and opal diffuser included, the profile softens and spreads light evenly while concealing LED chips for a smooth, uniform glow. The internal channel of approximately 10.3 mm is suitable for narrow LED strip lights, making this profile ideal for ambient or architectural lighting in residential and commercial spaces.
