PRODUCT OVERVIEW

The ARC-PB-F 2 Metre 10.5 mm Plaster-In LED Profile with Flange from ArcLED is a recessed aluminium LED channel designed to be integrated flush into plasterboard or drywall for sleek, hidden lighting. It features a 10.5 mm internal channel suitable for narrow LED strip lights and comes in a silver finish, making it a versatile choice for modern interiors. An opal diffuser is included, which helps to soften and spread the light evenly while concealing the LED chips for a smooth, uniform glow. The flange design helps secure the profile during installation and ensures a clean edge where the plaster meets the channel. Once plastered over, only the illuminated light line remains visible, giving a neat, architectural lighting effect ideal for ambient and accent illumination.
