PRODUCT OVERVIEW

The ARC-PB37 2 Metre 37 mm Plaster-In LED Profile (Silver) is a recessed aluminium LED channel designed for trimless lighting installations in plasterboard walls or ceilings. It features a wide 37 mm internal channel that can accommodate 1–2 LED strip lights (typically up to 10 mm wide each), allowing for a brighter, broader light output than slimmer profiles. An opal diffuser is included, which helps soften the light and hide individual LED chips for a smooth, even glow. The silver aluminium profile is installed by fixing it into place and plastering over its perforated edges so that only the illuminated section remains visible once finished giving a neat, professional, architectural lighting effect.

TECHNICAL SPECIFICATIONS

Length	2000mm
Internal Width	88mm
Overall Height	18.5mm
Depth	15.5m
Material	Extruded Aluminum 6063-T5
Led Lights	Fits upto 35mm Tape
