TECHNICAL INSTRUCTIONS

PRODUCT OVERVIEW

This single-wing plaster-in LED profile from ArcLED is designed to be recessed into plasterboard or drywall for a clean, integrated lighting solution. It features a compact 10.5 mm internal channel that is suitable for narrow LED strip lights and comes with an opal diffuser included, which softens and spreads the light for a smooth and uniform appearance once installed. The aluminium construction provides durability and helps with heat dissipation, while the single-wing design ensures a seamless transition between the profile and surrounding plaster for a sleek finish. It's ideal for ambient accent lighting, architectural illumination, or hidden linear lighting where a trimless look is desired.

TECHNICAL SPECIFICATIONS
