PRODUCT OVERVIEW

The ARC-PBCO Outside Corner Plaster-In Aluminium LED Profile from ArcLED is a recessed LED channel designed specifically for lighting around external corners (where two plastered surfaces meet at an outward angle). It features an internal width of ~10.5mm suitable for narrow LED strip lights and comes with an opal diffuser included to soften and spread light evenly while hiding individual LEDs for a smooth, uniform glow. Finished in silver aluminium, this profile is available in 2m or 3m lengths, and is intended to be fixed into place and plastered over so that only the illuminated light line remains visible along the corner once installed — creating a sleek, trimless architectural lighting effect in modern interiors.

TECHNICAL SPECIFICATIONS

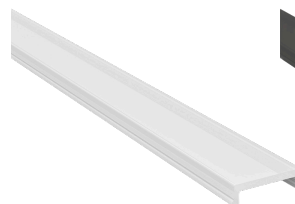

Length	2000mm, 3000mm
Internal Width	10.5mm
Overall Width	50.6mm
Depth	22.8mm
Material	Extruded Aluminum 6063-T5
Led Lights	Fits upto 10mm Tape
