PRODUCT OVERVIEW

This 40 mm 3 metre shadow gap profile from ArcLED is an aluminium LED channel designed to create a modern shadow gap lighting effect at the junction between walls and ceilings. The profile is 3m long and finished in white, offering a clean, minimalist look that blends into interior décor. It has an internal LED strip channel of about 10.3 mm suitable for standard LED strip lights and is ideal for housing LED tape that provides indirect, ambient illumination. Shadow gap profiles are typically recessed during installation so the LED strip sits hidden while light gently washes the surface, enhancing architectural detail and producing a sleek, contemporary lighting effect.

TECHNICAL SPECIFICATIONS

Length	3000mm
Internal Width	10.3mm
Overall Width	14.5mm
Depth	75mm
Material	Extruded Aluminum 6063-T5
Led Lights	Fits upto 10mm Tape
